⚡ A Word about Warped Panels

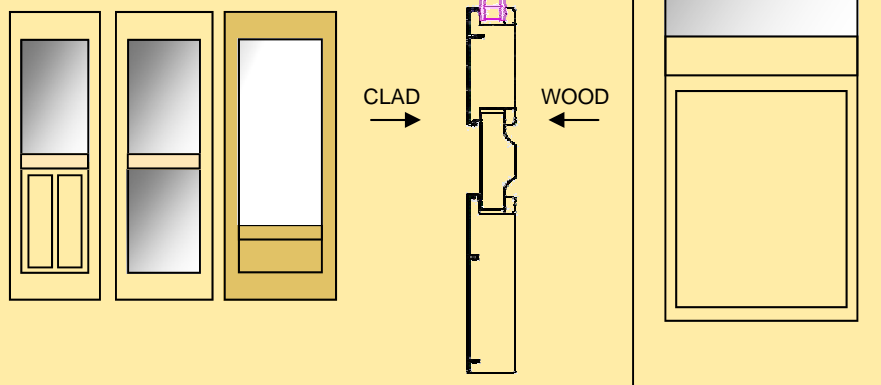

VISIT
www.park-vue.com

Special Bottom Panels Available on Patio Doors.

Exterior - Flat cladding
Interior - Raised panel

Pine - Standard
Other species available

Clad/Wood & Wood/Wood

When a Product Defect Isn't a Product Defect - PART 1

Check all aspects of installation before asking for product replacement.

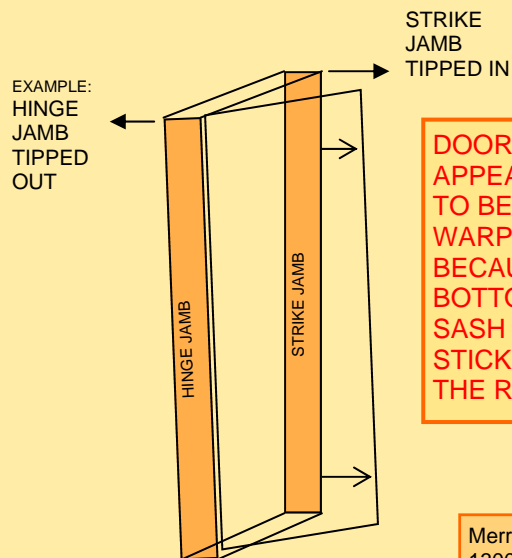

Warpage: Most often the door panel isn't warped at all. When the strike jamb and the hinge jamb are not perfectly vertical in relation to each other the panel will pull away from the strike jamb at either the top or the bottom.

Park-Vue's Swing Patio Doors are WARPAGE RESISTANT

- LVL LOCK STILES
- BUMPER SILL

No door sweep to cause closing drag
No adjustment on sill
Continuous seal on exterior face

DOOR APPEARS TO BE WARPED BECAUSE BOTTOM OF SASH STICKS INTO THE ROOM
