

## COLOR CHART Aluminum Clad Exterior

**Park-Vue Patio Doors : The leader in wood patio doors for over 50 years**

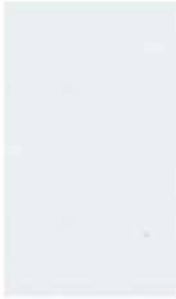

The aluminum cladding on our maintenance-free exterior is 100% extruded aluminum of .055" to .07".

Compare that to commonly used roll-form aluminum with a typical wall thickness of .019" or .024".

Our color choices are compatible with those of popular window and exterior trim manufacturers.

Don't pass up the best value in patio doors because you are unsure about colors matching.
